INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE | For the Period Ended September 30, 2025

Management Discussion of Fund Performance

November 13, 2025

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments that have affected the Fund's performance and outlook in the six-month period ended September 30, 2025 (the "period"). If the Fund was established during the period, "period" represents the period since inception.

In this report, "Mackenzie" and "the Manager" refer to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

Please read *A Note on Forward-Looking Statements* on the first page of this document.

Results of Operations

Investment Performance

The performance of all series in the current and previous periods is shown in the *Past Performance* section of the report. Performance will vary by series primarily because fees and expenses differ between series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series. The following comparison to market indices is intended to help investors understand the Fund's performance relative to the general performance of the markets. However, the Fund's mandate may be different from that of the indices shown.

During the period, the Fund's Series SC securities returned 1.0%, and Series LB securities returned 0.9% (after deducting fees and expenses paid by the series). This compares with the FTSE Canada Universe Bond Index return of 0.9%. All index and series returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in the index returns.

The Bank of Canada reduced its policy rate in September, to 2.50% from 2.75%, reflecting a weakening labour market, moderating inflation and the removal of retaliatory tariffs on imports from the United States. Inflation dipped below the central bank's target range as energy and goods prices softened. Canada's unemployment rate rose to 7.1% in August, underscoring consumer vulnerability amid high household debt and mortgage renewals at higher interest rates. Trade tensions and weakening housing activity weighed on market sentiment.

The Fund performed in line with the index, with duration management (sensitivity to changes in interest rates) contributing to performance. Overweight exposure to corporate bonds in the financial sector also contributed to performance.

Conversely, holdings in provincial bonds detracted from performance.

Over the period, neither portfolio activity nor market developments significantly changed the positioning of the Fund.

Net Assets

The Fund's net assets decreased by 2.4% during the period to \$350.7 million. This change was composed primarily of \$4.6 million in net income (including any interest and/or dividend income) from investment performance, after deducting fees and expenses, and a decrease of \$13.1 million due to net securityholder activity (including sales, redemptions and cash distributions).

At September 30, 2025, 39.9% of the Fund's NAV was held by investors that individually owned 10% or more of the Fund. As a result, the Fund is subject to large transaction risk as discussed in the Fund's Simplified Prospectus. Mackenzie manages this risk to reduce the possibility of any adverse effect on the Fund or on its investors, through such processes as requiring advance notice of large redemptions. At September 30, 2025, Mackenzie had received no such notices.

Fees and Expenses

The annualized management expense ratio ("MER") for each series during the period ended September 30, 2025, was generally similar to the MER for the year ended March 31, 2025. Total expenses paid vary from period to period mainly as a result of changes in average assets in each series. The MERs for all series are presented in the *Financial Highlights* section of this report.

Recent Developments

The portfolio management team believes that disinflationary trends provide an opportunity for the Bank of Canada to ease monetary policy further. In this environment, the team continued to favour higher-quality corporate bonds with shorter duration.

Related Party Transactions

Management and Administration Services

For each applicable series, the Fund paid management fees and administration fees to the Manager at the annual rates specified under *Fund Formation and Series Information* in this report and as more fully described in the Simplified Prospectus. In return for the administration fees, the Manager pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not included in management fees. See also *Management Fees*.

Other Related Party Transactions

At September 30, 2025, the Fund held investments in private funds managed by Northleaf Capital Partners, a company affiliated with the Manager. These investments represented, in aggregate, 0.4% of the Fund's net assets. The Fund held \$1.3 million in Northleaf Private Credit II LP, which represents US\$1.8 million as part of a total commitment to invest US\$2.2 million, and \$0.3 million in Northleaf Private Credit III LP, which represents US\$0.2 million as part of a total commitment to invest US\$1.3 million. In making the investment(s), the Manager relied on a positive recommendation previously issued by the Mackenzie Funds' Independent Review Committee.

At September 30, 2025, the Fund held an investment of \$1.4 million (0.4% of the Fund's NAV) in Sagard Credit Partners II, LP, a private fund managed by Sagard Holdings Inc., a company affiliated with the Manager. This represents US\$1.4 million as part of a total commitment to invest US\$2.2 million. In making the investment, the Manager relied on a positive recommendation previously issued by the Mackenzie Funds' Independent Review Committee.

Investment funds managed by Mackenzie and its affiliates may invest in the Fund. All these investments are made on a prospectus-exempt basis in accordance with the investment objectives of those funds. At September 30, 2025, funds managed by Mackenzie owned 1.5% of the Fund's NAV, and funds managed by The Canada Life Assurance Company and Canada Life Investment Management Ltd. owned 0.6% of the Fund's NAV. All related party transactions are based on the NAV per security on each transaction day.

At September 30, 2025, Mackenzie had an investment of \$0.1 million in the Fund (less than 0.1% of the Fund's NAV).

MACKENZIE STRATEGIC BOND FUND

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE | For the Period Ended September 30, 2025

During the period, the Fund received \$0.01 million in income distributions from investments in exchange-traded funds (“ETFs”) managed by Mackenzie to offset fees paid within those ETFs. There is no assurance that these distributions will continue in the future.

Past Performance

The Fund’s performance information assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The performance information does not take into account sales, redemption, distribution or other optional charges, or income taxes payable by any investor that would have reduced returns or performance. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

If you hold this Fund outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional securities of the Fund. The amount of reinvested taxable distributions is added to the adjusted cost base of the securities that you own. This would decrease your capital gain or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

Year-by-Year Returns

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

- (1) This information is provided as at the end of the fiscal period shown.
- (2) Management expense ratio (“MER”) is based on total expenses, excluding commissions and other portfolio transaction costs, income taxes and withholding taxes, for the stated period and is expressed as an annualized percentage of daily average net assets during the period, except as noted. In the period a series is established, the MER is annualized from the date of inception to the end of the period. Where the Fund directly invests in securities of another fund (including exchange-traded funds or “ETFs”), the MERs presented for the Fund include the portion of MERs of the other fund(s) attributable to this investment. Any income distributions received from ETFs managed by the Manager, with the intention of offsetting fees paid within those ETFs but which are not considered to be duplicative fees under regulatory requirements, are treated as waived expenses for MER purposes. The Manager may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.
- (3) The trading expense ratio (“TER”) represents total commissions and other portfolio transaction costs incurred as an annualized percentage of daily average net assets during the period. Where the Fund invests in securities of another fund (including ETFs), the TERs presented for the Fund include the portion of TERs of the other fund(s) attributable to this investment.
- (4) The Fund’s portfolio turnover rate indicates how actively the Fund’s portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher the Fund’s portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund’s portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

Management Fees

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by the Manager to pay for the costs of managing the investment portfolio of the Fund and/or the underlying fund(s), as applicable, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, and providing other services. The Manager also used the management fees to fund trailing commissions and any other compensation (collectively "distribution-related payments") to registered dealers and brokers whose clients invest in the Fund.

LBC Financial Services Inc. ("LBC") is the principal distributor for the LBC series securities of the Fund (as listed under *Fund Formation and Series Information*) and receives a portion of the management fees that the Fund pays to the Manager. Under this arrangement, LBC was entitled to approximately 26% of the total management fees that the Manager received from the LBC series of all Mackenzie funds during the period. The Manager is responsible for paying all distribution-related payments to LBC-authorized dealers whose clients invest in the LBC series of the Fund.

IG Wealth Management Inc., a dealer affiliated with the Manager, may be entitled to distribution-related payments from the Manager on the same basis as unrelated registered brokers and dealers.

The Manager used approximately 41% of the total management fee revenues received from all Mackenzie funds during the period to fund distribution-related payments to registered dealers and brokers. In comparison, such distribution-related payments for the Fund represented on average 31% of the management fees paid by all applicable series of the Fund during the period. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions paid for that series.
