

MACKENZIE ALTERNATIVE ENHANCED YIELD FUND

Interim Management Report of Fund Performance

For the Six-Month Period Ended September 30, 2025

This Interim Management Report of Fund Performance contains financial highlights but does not contain either the interim financial report or annual financial statements of the investment fund. You may obtain a copy of the interim financial report or annual financial statements, at no cost, by contacting us using one of the methods noted under Fund Formation and Series Information or by visiting the SEDAR+ website at www.sedarplus.ca.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure. For more information, please refer to the Fund's Simplified Prospectus and Fund Facts, which may also be obtained, at no cost, using any of the methods outlined above.

For the Fund's current net asset values per security and for more recent information on general market events, please visit our website.

A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events, outbreaks of disease or pandemics (such as COVID-19), and the ability of Mackenzie to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.

The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.

MACKENZIE ALTERNATIVE ENHANCED YIELD FUND

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE | For the Period Ended September 30, 2025

Management Discussion of Fund Performance

November 13, 2025

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments that have affected the Fund's performance and outlook in the six-month period ended September 30, 2025 (the "period"). If the Fund was established during the period, "period" represents the period since inception.

In this report, "Mackenzie" and "the Manager" refer to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

Please read *A Note on Forward-Looking Statements* on the first page of this document.

Results of Operations

Investment Performance

The performance of all series in the current and previous periods is shown in the *Past Performance* section of the report. Performance will vary by series primarily because fees and expenses differ between series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series. The following comparison to market indices is intended to help investors understand the Fund's performance relative to the general performance of the markets. However, the Fund's mandate may be different from that of the indices shown.

During the period, the Fund's Series A securities returned 6.5% (after deducting fees and expenses paid by the series). This compares with a return of 1.9% for the Fund's broad-based index, the ICE BofA Global Broad Market (Hedged) Index, and a return of 3.5% for a blended index.* All index and series returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in the index returns.

Global equities performed well over the period as shares of U.S. mega-capitalization companies involved in artificial intelligence ("AI") reached new highs. Continued AI investment, robust corporate earnings and a weakening U.S. dollar also supported global investor sentiment. Global fixed income markets reflected easing central bank monetary policy, slowing economic growth and moderating inflation.

Within the MSCI World High Dividend Yield (Net) Index, Africa and the Middle East and Asia Pacific (ex Japan) were the best-performing regions in Canadian dollar terms, while North America and Europe were the weakest. The information technology, real estate and materials sectors were the strongest performers, while energy, consumer staples and communication services were the weakest.

Within the MSCI World Infrastructure (Net) Index, Portugal, Japan and Switzerland were the best-performing markets in Canadian dollar terms, while New Zealand, Germany and the United States were the weakest. The health care, industrials and utilities sectors were the strongest performers, while energy and communication services were the weakest.

Within the FTSE EPRA Nareit Developed REITs Index, Italy, Spain and Australia were the best-performing markets in Canadian dollar terms, while the United States, the United Kingdom and Germany were the weakest. Among sub-industries, diversified

residential real estate investment trusts ("REITs"), office REITs and retail REITs were the best performers, while multi-family residential REITs, single-family residential REITs and data center REITs were the weakest.

The Fund outperformed the broad-based index because of its allocation to equities, which outperformed fixed income in the period. Given the Fund's mandate, the return of the blended index is a more meaningful comparison.

The Fund outperformed the blended index, with the equity portfolio outperforming the equity portion of the blended index. The fixed income portfolio underperformed the fixed income portion of the blended index.

Within the equity portion of the Fund, stock selection in the United States and an overweight position and stock selection in Canada contributed to performance. In sector terms, overweight positions and stock selection in information technology and financials contributed to performance. Conversely, lack of exposure to Japan and stock selection in the materials sector detracted from performance.

Within the fixed income portion of the Fund, underweight exposure to corporate bonds detracted from performance, as did currency management. Holdings in term loans and underweight exposure to government bonds contributed to performance.

The Fund's covered call strategy (selling options on its equity holdings) detracted from performance.

Over the period, neither portfolio activity nor market developments significantly changed the positioning of the Fund.

Leverage

Leverage occurs when the Fund borrows money or securities, or uses derivatives, to generate investment exposure that would otherwise not be possible. The Fund's aggregate exposure to its sources of leverage is calculated as the sum of the following: (i) the market value of short holdings; (ii) the amount of cash borrowed for investment purposes; and (iii) the notional value of the Fund's derivatives positions, excluding any derivatives used for hedging purposes. This exposure must not exceed 300% of the Fund's NAV.

The Fund may use conservative amounts of leverage by borrowing to strategically help fund its yield target and monthly distribution. During the period, the Fund's aggregate exposure to sources of leverage ranged from a low of 9.3% of NAV in September 2025 to a high of 10.1% in April 2025, based on the portfolio management team's target of 10%. The source of leverage was cash borrowing. Including the notional value of derivatives used for hedging, such as options, swaps and forward currency contracts, leverage ranged from a low of 34.8% to a high of 76.3%.

Net Assets

The Fund's net assets increased by 101.0% during the period to \$433.0 million. This change was composed primarily of \$38.6 million in net income (including any interest and/or dividend income) from investment performance, after deducting fees and expenses, and an increase of \$179.0 million due to net securityholder activity (including sales, redemptions and cash distributions).

Fees and Expenses

The annualized management expense ratio ("MER") for each series during the period ended September 30, 2025, was higher than the MER for the year ended March 31, 2025, due to an increase in fund costs. Total expenses paid vary from period to period mainly as a result of changes in average assets in each series. The MERs for all series are presented in the *Financial Highlights* section of this report.

* The blended index is composed of a 40% weighting in the ICE BofA Global Broad Market (Hedged) Index (returned 1.9%), a 25% weighting in the MSCI World High Dividend Yield (Net) Index (returned 3.7%), a 15% weighting in the ICE BofA Global High Yield (Hedged) Index (returned 4.9%), a 10% weighting in the MSCI World Infrastructure (Net) Index (returned 7.0%) and a 10% weighting in the FTSE EPRA Nareit Developed REITs Index (returned 3.7%).

MACKENZIE ALTERNATIVE ENHANCED YIELD FUND

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE | For the Period Ended September 30, 2025

Recent Developments

The portfolio management team makes strategic allocations to income-producing asset classes using a quantitative optimization process. This process uses current yield, expected future return, risk and correlations for each asset class as inputs. These are based on historical analysis and the team's expectations for these asset classes in the current environment.

Related Party Transactions

Management and Administration Services

For each applicable series, the Fund paid management fees and administration fees to the Manager at the annual rates specified under *Fund Formation and Series Information* in this report and as more fully described in the Simplified Prospectus. In return for the administration fees, the Manager pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not included in management fees. See also *Management Fees*.

Other Related Party Transactions

The Manager is wholly owned by IGM Financial Inc., which in turn is a subsidiary of Power Corp. of Canada. Companies related to Power Corp. of Canada are therefore considered affiliates of the Manager. At September 30, 2025, the Fund held the following investment(s) in companies affiliated with the Manager: \$2.3 million invested in securities issued by Power Corp. of Canada and \$1.8 million invested in securities issued by Great-West Lifeco Inc. The investment(s) represented 0.9% of the Fund's NAV. In making the investment(s), the Manager relied on the approval of the Mackenzie Funds' Independent Review Committee. The Independent Review Committee issued the approval on the basis that the investment(s) would be made in compliance with the Manager's policies. The Manager's policies are designed to ensure that any related party transaction (i) is made free from any influence by an entity related to the Manager and without taking into account any considerations relevant to an entity related to the Manager; (ii) represents the business judgment of the Manager, uninfluenced by considerations other than the best interests of the Fund; and (iii) achieves a fair and reasonable result for the Fund.

Investment funds managed by Mackenzie and its affiliates may invest in the Fund. All these investments are made on a prospectus-exempt basis in accordance with the investment objectives of those funds. At September 30, 2025, funds managed by Mackenzie owned 91.1% of the Fund's NAV, and funds managed by I.G. Investment Management, Ltd. owned 5.7% of the Fund's NAV. All related party transactions are based on the NAV per security on each transaction day. As a result of these investments, the Fund may be subject to large transaction risk as discussed in the Fund's Simplified Prospectus. Mackenzie manages this risk to reduce the possibility of any adverse effect on the Fund or on its investors, through such processes as requiring advance notice of large redemptions.

During the period, the Fund received \$0.1 million in income distributions from investments in exchange-traded funds ("ETFs") managed by Mackenzie to offset fees paid within those ETFs. There is no assurance that these distributions will continue in the future.

Past Performance

The Fund's performance information assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The performance information does not take into account sales, redemption, distribution or other optional charges, or income taxes payable by any investor that would have reduced returns or performance. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

If you hold this Fund outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional securities of the Fund. The amount of reinvested taxable distributions is added to the adjusted cost base of the securities that you own. This would decrease your capital gain or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

Year-by-Year Returns

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

(1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's unaudited interim financial statements and audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences, if any, can be found in the *Notes to Financial Statements*.

(2) Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.

(3) Distributions were paid in cash/reinvested in additional securities of the Fund, or both.

- (1) This information is provided as at the end of the fiscal period shown.
- (2) Management expense ratio (“MER”) is based on total expenses, excluding commissions and other portfolio transaction costs, income taxes and withholding taxes, for the stated period and is expressed as an annualized percentage of daily average net assets during the period, except as noted. In the period a series is established, the MER is annualized from the date of inception to the end of the period. Where the Fund directly invests in securities of another fund (including exchange-traded funds or “ETFs”), the MERs presented for the Fund include the portion of MERs of the other fund(s) attributable to this investment. Any income distributions received from ETFs managed by the Manager, with the intention of offsetting fees paid within those ETFs but which are not considered to be duplicative fees under regulatory requirements, are treated as waived expenses for MER purposes. The Manager may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.
- (3) The trading expense ratio (“TER”) represents total commissions and other portfolio transaction costs incurred as an annualized percentage of daily average net assets during the period. Where the Fund invests in securities of another fund (including ETFs), the TERs presented for the Fund include the portion of TERs of the other fund(s) attributable to this investment.
- (4) The Fund’s portfolio turnover rate indicates how actively the Fund’s portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher the Fund’s portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund’s portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

MACKENZIE ALTERNATIVE ENHANCED YIELD FUND

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE | For the Period Ended September 30, 2025

Management Fees

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by the Manager to pay for the costs of managing the investment portfolio of the Fund and/or the underlying fund(s), as applicable, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, and providing other services. The Manager also used the management fees to fund trailing commissions and any other compensation (collectively "distribution-related payments") to registered dealers and brokers whose clients invest in the Fund.

IG Wealth Management Inc., a dealer affiliated with the Manager, may be entitled to distribution-related payments from the Manager on the same basis as unrelated registered brokers and dealers.

The Manager used approximately 41% of the total management fee revenues received from all Mackenzie funds during the period to fund distribution-related payments to registered dealers and brokers. In comparison, such distribution-related payments for the Fund represented on average 9% of the management fees paid by all applicable series of the Fund during the period. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions paid for that series.

MACKENZIE ALTERNATIVE ENHANCED YIELD FUND

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE | For the Period Ended September 30, 2025

Fund Formation and Series Information

The Fund may have undergone a number of changes, such as a reorganization or a change in manager, mandate or name. A history of the major changes affecting the Fund in the last 10 years can be found in the Fund's Simplified Prospectus.

Date of Formation: April 17, 2020

The Fund may issue an unlimited number of securities of each series. The number of issued and outstanding securities of each series is disclosed under *Financial Highlights*.

Series Offered by Mackenzie Financial Corporation (180 Queen Street West, Toronto, Ontario, M5V 3K1; 1-800-387-0614; www.mackenzieinvestments.com)

Series A are offered to retail investors investing a minimum of \$500. Investors in Series A securities also want to receive a monthly cash flow of 7% per year.

Series F securities are offered to retail investors who are enrolled in a dealer-sponsored fee-for-service or wrap program, who are subject to an asset-based fee rather than commissions on each transaction and who invest at least \$500; they are also available to employees of Mackenzie and its subsidiaries, and directors of Mackenzie. Investors in Series F securities also want to receive a monthly cash flow of 7% per year.

Series FB securities are offered to retail investors investing a minimum of \$500. Investors are required to negotiate their advisor service fee, which cannot exceed 1.50%, with their financial advisor. Investors in Series FB securities also want to receive a monthly cash flow of 7% per year.

Series IG securities are offered exclusively to mutual funds managed by I.G. Investment Management, Ltd.

Series O securities are offered only to investors investing a minimum of \$500,000 who are enrolled in Mackenzie Portfolio Architecture Service or Open Architecture Service, retail investors investing a minimum of \$5 million, certain institutional investors, investors in a qualified group plan, and certain qualifying employees of Mackenzie and its subsidiaries.

Series PW securities are offered through our Private Wealth Solutions to certain high net worth investors who invest a minimum of \$100,000. Investors in Series PW securities also want to receive a monthly cash flow of 7% per year.

Series PWFB securities are offered through our Private Wealth Solutions to certain high net worth investors who invest a minimum of \$100,000. Investors are required to negotiate their advisor service fee, which cannot exceed 1.50%, with their financial advisor. Investors in Series PWFB securities also want to receive a monthly cash flow of 7% per year.

Series PWX securities are offered through our Private Wealth Solutions to certain high net worth investors who invest a minimum of \$100,000. Investors are required to negotiate their advisor service fee, which cannot exceed 1.50%, with their financial advisor. Investors in Series PWX securities also want to receive a monthly cash flow of 7% per year.

Series R securities are offered only to other funds managed by Mackenzie on a non-prospectus basis in connection with fund-of-fund arrangements.

Each series is available for purchase under the sales charge purchase option. The charges under the sales charge purchase option are negotiated by investors with their dealers. For further details on this purchase option, please refer to the Fund's Simplified Prospectus and Fund Facts.
